KEYNOTE SPEAKERS

Bastain Treptel

Ex hacker, Founder of CTRL Group, Futurist and Entrepreneur

Appears by arrangement of Claxton Speakers International

Bastien is dedicated to inspiring everyone to appreciate security as it becomes an essential part of our lives as we move into a hyper digitized world. Being paid by the largest organisations in the world to breach systems and people he has a unique insight into the access achievable and the corporate and personal damage that can be enacted.

Bastien has developed a progressive security methodology to enable clients to achieve a respectable level of Cyber maturity, effectively helping them mitigate critical risks posed to their stakeholders and shareholders.

He is sought after by media and various boards to disseminate knowledge on the latest cyber-security trends, threats and tips to stay as protected as possible. He also hosts two podcast series: CyberHacker and CyberWatch, which have achieved over 100,000 subscribers and is currently in production for season 2.

Victor Dominello

Former Minister of Customer Service and Digital for NSW Government

Professor at the University of New South Wales

Senior Advisor – Public Service

Dominello served as a Minister in NSW for 12 years, and is best known for his role as Minister for Customer Service and Minister for Digital. He is celebrated for the creation and transformation of the Department of Customer Service.

Considered the pioneer of digital government in Australia, his achievements have been admired, studied and modelled by other governments around the world.

Dominello serves as an independent advisor and board member to corporate boards and governments with a focus on digital technologies and mental health.

In September 2023, Victor launched Service Generation, which provides advice to governments and large organisations to help them profoundly shift service delivery for the times ahead.

John Maclean

Australian triathlete, rower, and motivational speaker

“There is a point where we shift, as humans, from an age where we think anything is possible, to where we internally and externally start to limit ourselves. It’s like we put on a handbrake and start creating barriers for ourselves. Limitations are created from an internal dialogue that takes place in our brain, that tells us as humans what we think we are capable and incapable of.”

22 years of age, fit and healthy, living a dream of becoming a professional athlete, life was good, for John Maclean, but life can change in a heartbeat. After a tragic accident, self-belief propelled him to achieve, and achieving nurtured confidence. That confidence challenged him to take control of his internal dialog and forge an extraordinary path to his ultimate goal.

Anthony Bonnici

Leadership Performance Expert

With an extensive & unique range of keynote presentations, coaching programs and hands-on workshops, the Anthony Bonnici experience will leave your people inspired to make positive changes to their work and personal lives, and improve their performance & productivity by showing people how they CAN rather than CAN'T.

Anthony has 13 years experience in corporate Australia in sales, marketing & people leadership roles. In addition to face to face selling roles, Anthony turned “middle of the road” sales teams into high performing teams as well as looking after marketing teams with brands worth over \$150 million.

In 2005 Anthony left the corporate life to follow his dream of creating his own company to inspire and motivate others. He is at ease speaking to any audience, and is a certified NLP (Neuro Linguistic Programming) Master Practitioner. Anthony has been “on stage” & performing since the age of 10, and his use of real life examples with which all audience levels can identify makes his sessions unpretentious yet incredibly powerful & memorable.
